

# Seminars, Workshops, & Conferences

One or more Videographers shoots with at least two video cameras to capture the Event's speaker.

For sound we put a Sony ECM-AW3 wireless lavalier microphone on the main speaker. We also put a Zoom H2n Digital Microphone on the main podium. If there is a soundboard we will capture sound from the board via XLR cable into a camera or AUX cable into a Digital Recorder.

We edit PowerPoint presentations into the video. We will bring a USB Flash-drive to the event and ask for all PowerPoint files be put on it so we have them before editing.

Soon after your event's date we will start editing the video. The final video can be delivered on a USB flash-drive or DVD.
