

## Real Estate Virtual Tours

It takes the videographer about 2 hours to document a walk-through of a two bedroom house. We walk through the house twice. Once with a Go Pro with a ultra-wide angle lens, and once with a Sony HXR-MC 2500 camera. We also spend time going room-to-room shooting close ups and other camera moves.

Shortly after documenting the property, we start the editing process. Once this process is complete, we export the video file into a compressed QuickTime Movie file (.mov) Note: the average file size of a 3-minute video is 7 MB. We then email you this video file. Once approved, this file can be uploaded to the property's online listing.

### Cost Breakdown

\$90 - videographer  
\$90 - video editing

# \$180

Please view demonstration video on this website.
